Delivering Efficiency, Quality and Sustainability in Healthcare

# EcoQUIP – Common Priorities?

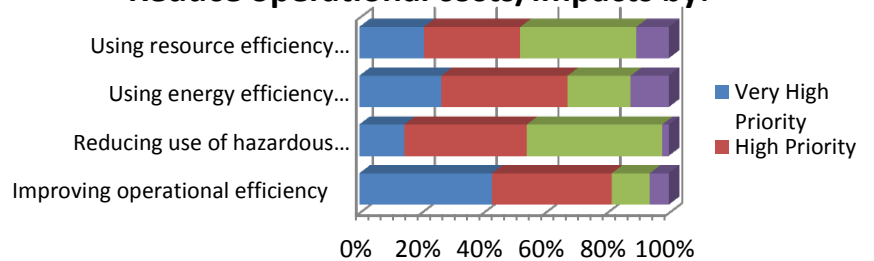

Provocation Paper  
**Challenges, priorities and emerging innovative solutions for the healthcare sector**

Prepared for the  
 Innovation Procurement Workshop  
 Oxford, 16<sup>th</sup> September 2013

## Reduce the burden on hospitals by:

## Reduce operational costs/impacts by:

# EcoQUIP – Joint Actions

## Conclusions from 1<sup>st</sup> Workshop

1. ICT solutions for healthcare
2. Energy for healthcare
3. Patient environment and experience
4. Technologies to reduce environmental impact
5. Management standards for innovation procurement

# Progress on Joint Actions

## ICT solutions for healthcare

- Spin off H2020 project (EPP-eHealth)

## Energy for healthcare

- Strategic Policy Roadmap project (Energy4Health)

## **Patient environment and experience**

- **Common area of interest**
- **Workshop discussion (to follow)**

## Technologies to reduce environmental impact

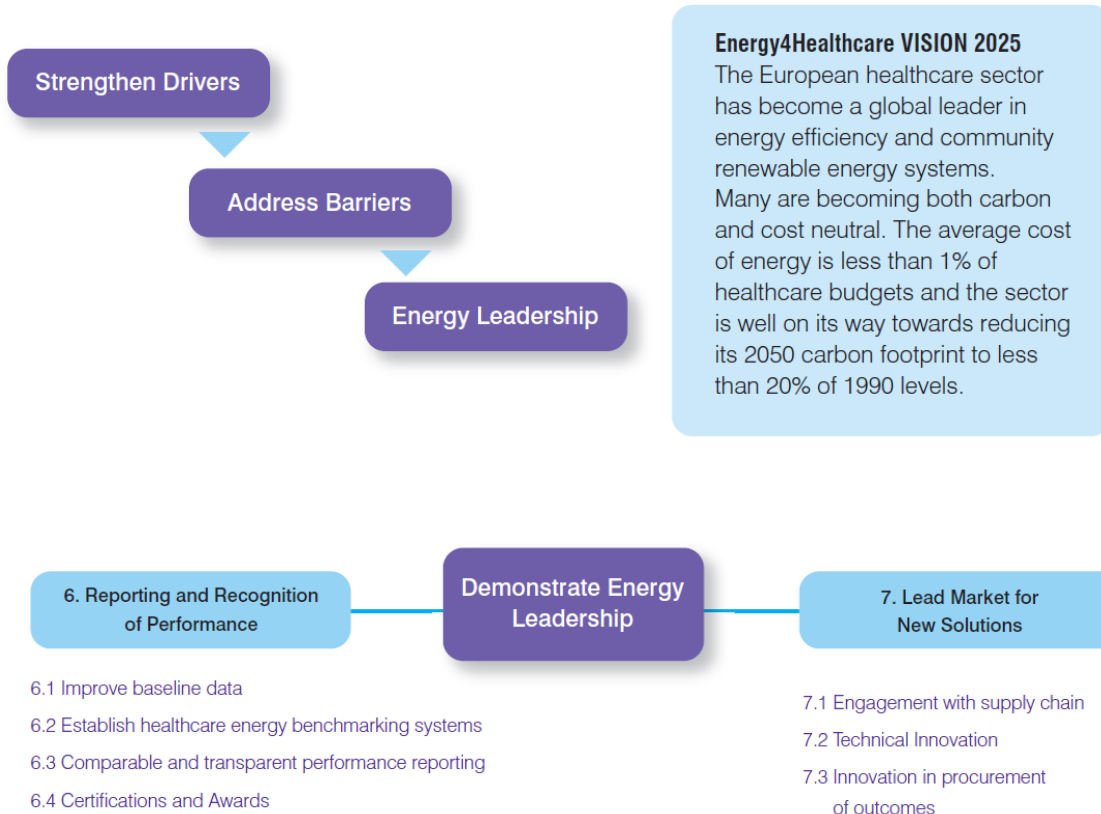

- Engagement with UN global procurement hub for health-related products (greening the supply chain)

## Management standards for innovation procurement

- Exploring with CEN-CENELEC

# Energy4Health Policy Roadmap

*Develop and secure stakeholder commitment for a strategic policy roadmap to improve the framework conditions that influence the demand for and market uptake of innovative energy solutions in the healthcare sector*

***Potential to implement the action plan through the H2020-EE-2015-3 Market Uptake Call (June 2015)***

# Leadership Programme for innovation procurement in healthcare

**Autumn 2015** – Madingley Hall, Cambridge

---

The seminar will be delivered over 3-days and will bring together an 'Innovation Procurement Leaders Group' to develop and increase competence in innovation procurement and the capacity to pioneer new approaches to collaborative procurement. Dates will be announced in January 2015.

To cater for individual and collective learning, a series of intensive sessions will combine different learning approaches. Participants will be encouraged to apply their experience, challenges, opportunities and knowledge to the practical issues and challenges they, and others, face. The group will be encouraged to be part of the continuing delivery mechanism for future programmes. A key outcome of the seminar will be to identify joint and collaborative actions that can be realised through the EcoQUIP project and Horizon2020\*.

The workshops and seminars will take a very practical, pragmatic approach; encouraging participants to show how delivering the triple outcomes of efficiency, quality and sustainability is increasingly part of the core agenda, and how to position themselves as thought and action leaders in the field.
